IPTV

IPTV - Internet Protocol Television is the delivery of live TV content & Video-On-Demand (VOD) via existing copper or fiber optic networks using IP as a medium.

ITSthe1 Interactive Television Solutions using IPTV technology for enhanced guest experience, and a promotions and marketing avenue for hotel operators to generate revenue.

ITSthe1 brings more than 20 years of expertise in the field of IPTV. Our very own 1.TV middleware gives you full customization of the user interface as per your corporate branding. Whether it is a hotel, hospital, university, ship, residential community or Telco solution for a whole country, we are able to provide solutions and services.

Yotel Paris
Guests are greeted by an impressive array of Zest Station screens upon arrival. The customization reflects and supports the hotel's overall branding.
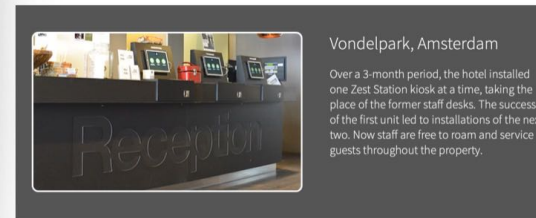

Core Components

Zoku Amsterdam
Zoku built the Core Components into the millwork so that the Zest Station feels totally integrated with the unique lobby environment.

Vondelpark, Amsterdam
Over a 3-month period, the hotel installed one Zest Station kiosk at a time, taking the place of the former staff desks. The success of the first unit led to installations of the next two. Now staff are free to roam and service guests throughout the property.

High Speed Internet Access (HSIA)

ITSthe1 offers all-in-one Service Management Platform to monetize existing internet services and maximize limited bandwidth, while on boarding guest with ease through social media access. Additionally this allows hoteliers to get a clearer view of their guest profile and behavior, hence increasing revenue through target marketing and guest experience.

HSIA Features

- Supports social media as a form of authentication
- Understand how your customers are using WIFI – dashboard Venue status, login methods, usage statistics, gender reporting and loyalty from your estate dashboard
- Bandwidth management – our tools display the available bandwidth and internet quality to ensure you are able to monitor and react
- User Analytics – full range of reports, both visual and downloadable CSV files provide you daily, weekly and monthly insights into the guests usage platforms
- Marketing Injets – inbuilt with guest engagement injets to push marketing promotions and offerings

Casting Solutions

Making your guests feel at home with the best in streaming content powered by Google Chromecast is a simple and secure BYOC (Bring Your Own Content) solution, using a standard Chromecast device and a Casting Controller appliance, allowing guests to stream their own content to the in-room TV.

Guests only need to be connected to the hotel guest Wi-Fi, and like at home, will be able to connect their device to the TV. The privacy of the guest is guaranteed and no guest data or credentials are stored or logged on the TV system.

Main Benefits

- Compatible with any TV brand
- Any network/WiFi vendor, no special features needed
- Standalone or integrated with IPTV
- Simple pairing using QR code
- Only the Chromecast(s) of the room visible
- Guaranteed security for guest content and credentials
- Physical locking and tamper detection
- Supports multiple devices per TV and per room
- Dashboard for usage stats & alarms; API for status/reports

Guest Room Management System (GRMS)

The Guest Room Management System (GRMS) provides innovative and efficient control of lighting, heating/cooling and hotel guest services through intuitive touch panel interfaces.

ITSthe1's GRMS aims to help hotels and resorts extend comfort, control and connectivity to the guests. Saving utility costs, driving their environmental sustainability initiatives, while providing a better guest experience.

The Guest Control Panels

- Intuitive, instantly understandable guest control interfaces
- Control of lighting scenes, thermoregulation settings and hotel guest services
- Motion sensors can be built-into the glass panels and allow the most efficient detection of guest presence
